

FOR IMMEDIATE RELEASE

January 28 2014

Wind4All Communities II Inc. – New CEDIF Offering Now Open.

Wind4All Communities II, the third in the Wind4All family of companies launched their CEDIF Offering on January 28 2014, which means there is once again a new opportunity to invest in a late stage wind energy project. Just like its predecessors, Wind4All Communities II presents an opportunity for eligible Nova Scotians to invest directly in green, renewable energy. It has been created and sponsored by the wind energy development company Natural Forces Wind Inc. (Natural forces).

Through this new CEDIF offering, Wind4All Communities II Inc. will seek to raise up to \$3 million, the net proceeds of which will be used to invest in the Aulds Mountain Community Wind Farm, a two-turbine 4.6 MW wind energy project, located near the community of Piedmont, Pictou County.

The project has been awarded COMFIT approval by the Department of Energy, and has a 20 year Power Purchase Agreement secured with Nova Scotia Power. It is anticipated that construction for this project will commence in the summer of 2014, with the first electricity generation expected by the end of 2014.

In 2013, Wind4All Communities Inc., Natural Forces, and Assante Capital Management Ltd (Assante) worked together to attract over 400 investors raising a record setting \$5.5 million dollars. The net proceeds of this CEDIF have been used to acquire a 58% stake in two other community wind farms, both of which are now under construction.

Austen Hughes, President of Wind4All family says: *“This is our third foray into the CEDIF world in as many years, and we remain dedicated to the philosophy of our previous investments – work with a credible and experienced team, and invest only in late stage wind energy projects. Through the excellence of the COMFIT & CEDIF programs, we’ve been able to facilitate community owned wind energy generation in Nova Scotia, in addition to promoting rural economic development”.*

Richard Alderman of Assante Capital Management Ltd. says: *“Last year we raised the bar again for the Nova Scotia CEDIF program, raising \$5.5 million with over 400 individual investors. The success we have experienced is due to the model developed by Natural Forces and the partnership with a proven wealth management advisory firm. That combination gives Nova Scotians the opportunity to invest in a late stage community project delivering green energy and financial opportunity”*

In February of 2014, Natural Forces, Assante, and Wind4All Communities II will be hosting more than a dozen investment and information seminars, both public and private across the entire province, to present more information on the CEDIF offering. Details can be found on www.wind4all.ca and www.assantehydrostone.com/wind4all
