

FOR IMMEDIATE RELEASE

April 3, 2014

Wind4All Inc. – Declares 2nd Dividend Payment

Wind4All Inc. (“Wind4All”), today announced a dividend, the company’s second, in the amount of \$0.06 per share, equating to a total shareholder distribution of \$141,090 for 2,351,500 shares. The dividend was paid to its shareholders of record, on April 2, 2014. Wind4All is a Community Economic Development Investment Fund pursuant to provincial regulations

Austen Hughes, President of Wind4All says “We’re showing that community wind can work in Nova Scotia. We invested in one of the first large scale community wind farms ever built here, and we’re now able to reward our shareholders for the second time in two years”

Wind4All raised over \$2.35 million in its first CEDIF offering, which successfully closed in February of 2012. The company used the net proceeds of this offering to invest in the Fairmont Wind Farm; a 4.6 MW wind farm located 6 km north of Antigonish.

Wind4All holds a 35% economic interest in the Fairmont Wind Farm, which achieved full commercial operation in December of 2012. It is anticipated that the project will serve the electricity needs of over 1,100 Nova Scotian families for the next 20-25 years.

A number of Antigonish and Pictou County businesses were involved in the Fairmont Wind Farm with over \$3 million being spent both locally, and throughout the province of Nova Scotia, during the development and construction phases of the project. It is expected that a further \$8 million will be spent in the province over the wind farm’s lifetime.

With **Assante Capital Management Ltd.** acting as the exclusive selling agents under the CEDIF offering, over 150 proud Nova Scotians can say that they own a piece of the Fairmont Wind Farm, through their investment in Wind4All.

The project was developed by **Natural Forces**; a maritime-owned renewable energy company based in Halifax, Nova Scotia. Natural Forces personnel have over 30 years of combined experience in developing, constructing, and operating wind energy projects around the world.
